

**Samuel Coleman**  
**2<sup>nd</sup> Year, Medical Student**  
**University of Cape Coast, UCC**

### **Samuel Coleman's Story**

*"I became a past student of Ghana Secondary Technical School (GSTS), Takoradi after sitting the WASSCE, 2020. I stayed home for a year to help my parents gather resources to help me continue with tertiary education.*

*As it stands now, the financial status of my family cannot afford to sponsor me as my parents struggled to demand help from my sister and my uncle (who took a loan for us to be paid in installments) to pay my admission fees which were worth GHC12,485.00. Awarding me this scholarship will clear my regular thinking about how to finance my education for the subsequent years.*

*I am a very positive and happy person who has the mindset that you only get out of life what you are prepared to put in. Although I am young, I have big ambitions for my future, and I know the only way I will achieve those set ambitions is if I work hard, persevere, and I am prepared to listen and learn. Outside of my studies, I keep myself fit and active and I enjoy spending time with my family. I dedicate some time to my own personal development.*

*I understand lots of people apply for this scholarship and I would hope my future ambitions and my promise that I will be committed to my studies, make me a strong applicant.*

*I want to be a beneficiary of this scholarship program to be financially and academically supported as this will help me climb higher on the educational ladder and also go a long way to assist me to attain my long-term goal of being a medical doctor in the future.*

*I believe I deserve this scholarship because I have genuine, achievable plans for my career and I understand I will only achieve those plans if I apply myself throughout my studies. I have got to know the significance of applying oneself and being consistent in whatever you do and making sure, you do it to the right standard. If I am fortunate enough to get this scholarship, I will be committed to my studies and I will repay the trust you will have shown to me, by being a model student, supporting others, and ensuring I achieve my goals.*

*I want to be a medical doctor because I am so passionate about Medicine. Studying Medicine will not only help me to make a difference in people's lives but will also get me the opportunity*

*to directly influence and educate people to lead healthier lives. Educating people on their health and ensuring they adhere to the highlighted issues to promote their health care in the nation will minimize the increasing number of individuals falling sick every day putting pressure on hospitals and health personnel.*

*Public campaigns on health will also show a great significant decrement in the health burden on the government, save the country from importing too many drugs from other countries and the money budgeted to provide us with drugs will be channeled to other profitable ventures like education to quicken the development of Ghana”.*

Samuel stood out during his final interview with the JEQ Foundation founders, and he is now receiving tuition and residential scholarships.
