

I recently graduated from the University for Development Studies, Nyankpala Campus, with a Bachelor of Science (BSc) degree in Mechanical Engineering in 2022 with a first-class honor (CGPA of 4.89 out of 5.00) after four (4) years of study.

I was one of the fortunate individuals who had the opportunity to experience such a remarkable educational process that combined academic knowledge linked with hands-on industrial experience. As an undergraduate student at the university, I kicked start my career with internships in engineering with GRATIS foundation (Ghana Regional Appropriate Technology Industrial Service) and Savanna Agricultural Research Institute (SARI) during my second and third years ' respectively as part of my degree requirements.

Upon completing my undergraduate degree from the university, I had the privilege to do my one (1) year mandatory national service with AngloGold Ashanti Ghana Limited, Obuasi, where I'm currently working.

Having been in the engineering space so far, I realized that the nature of work is changing as technology evolves and the engineering field becomes more diverse. Due to this, my future plans are to further my education by obtaining a master's degree in Mechanical and Industrial Engineering. Earning this degree will demonstrate my commitment to gaining industry expertise, credibility and additional skills, subject matter knowledge, and competencies that will make me more competitive professionally to address changing issues at the workplace and improve the world through engineering.

Realizing the values of keeping my options open, I also look forward to opportunities to work with the industry to expand my technical skills after my national service. I also plan to contribute to my community through mentoring junior colleagues, communal labour and being a positive role model for them to look up to.

I therefore look forward to graduate school opportunities in terms of scholarships and sponsorship both locally and abroad and also work/job vacancies and will appreciate a help to recognize my dreams. Thank you.
