

Shahadu Abubakari
3rd Year, Mechanical Engineering Student
University of Development Studies, UCC

Shahadu Abubakari's Story

"I was very delighted when I heard about the JEQ foundation scholarship program for needy but brilliant students. I am pursuing a Bachelor of Science degree in mechanical engineering at the University for Development Studies (UDS). I am writing to express my strong will to seek support from your foundation to help me complete my program.

As a kid growing up in a village, I spent a good portion of my childhood in hospitals after school with my mom. My father always carried the financial burden of my mother's health condition and our educational finances. This and many others were there as on I could not apply or go to tertiary when I completed high school in 2019 even when I was the best student among the graduating class in my school.

As a kid growing up, I loved the idea of the challenge that took me a few minutes to contemplate. Even though I could not find realistic solutions, I always find joy in challenging myself. In the course my educational career, I am always working very hard against all odds to be among the best.

My goal in life is to help and to cooperate within the best of my capabilities as a student and a young developer to solve problems that are considered as a pain in the neck as far as society is concerned. I am always trying to find out the best suitable way to conserve energy. My ultimate goal is to lower energy consumption and preserve the natural environment. I love the idea of solar, geothermal, hydropower, and wind energy.

In view of this. I dream of not only becoming an Engineer but a competent and capable one who will put it into use. his technical know-how and skills in the area of energy and thermal fluids through the training and knowledge red in school and the industry.

Aside from my professional and educational goals, I would like to actively participate in bringing impact on the society, economic, political, and technical development of the people in my community and my dear Nation as a whole.

My academic plans involve dedicating myself to learning all I can at the university. I will fully dedicate my time and energy to becoming well-versed in engineering. I will earn a master's degree if possible and devote myself to the industry”.

The good news is, JEQ Foundation offered Shahadu tuition and housing scholarships throughout his bachelor's program at UDS.

Join us to impact more students like Shahadu.
